Thursday, October 6 • 12:00-1:15pm • IARC 401

## IARC Research Salon Series:

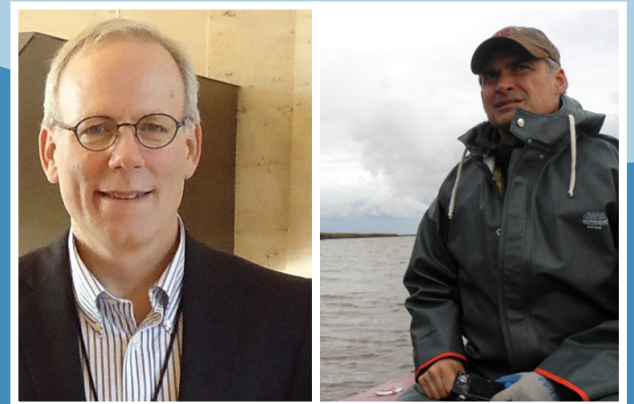

### Climate Change and Health in Alaska

*John Walsh  
Bert Boyer  
Michael Brubaker*

The IARC Salon Series highlights topics in science that form the foundation of IARC's community - atmosphere, oceans, terrestrial processes, and integrated system studies.

For the first edition of AY16-17, researchers John Walsh (IARC), Bert Boyer (IAB/Center for Alaska Native Health Research), and Michael Brubaker (Alaska Native Tribal Health Consortium) will discuss topics including:

- \* Climate projections for Alaska in the context of health/lifestyle in our communities.
- \* Direct/indirect impacts of climate on health in Alaskan communities (lifestyle changes, food changes).
- \* Health and climate change, as seen through the lens of ANTHC and the LEO Network, including challenges, outlook, and interdisciplinary research opportunities to address the existing and anticipated challenges.

Coffee and tea will be served. Bring your quiet lunch.
