

ESSENTIAL OF STATISTICS WITH SPSS

DATES: April 8th (11am – 5pm) and 9th (1pm – 5pm)

LOCATION: Instructional Micro Computer Lab
(Rasmuson 301)

- **Would you like to learn essential statistical methods with a powerful, yet very user-friendly software?**
- **Has it always been daunting to make sense of statistical outputs?**
- **Would like to better understand statistical results of scientific articles?**
- **Do you need help with data analysis for the Research Day?**

If you answered yes to any of these questions, this workshop is just right for you! Come and enjoy a productive weekend of INTUITIVE statistics! Minimum math is involved and no laptop is needed!
